Senior Planner Barbara Weigel stated that P.Z. 11-2002 City of Chesterfield is an update to the Comprehensive Plan and includes changes to existing, proposed and new uses for the entire geographic area of the City of Chesterfield. Ms. Weigel stated that there are several reasons for the update of the Comprehensive Plan: The current plan is over 10 years old with being adopted two (2) years after incorporation of the City, the current plan has been revised nine (9) times including twice since 1999, many of the original plan objectives have already been achieved or changed and the dynamics of the community have changed and the population has changed considerably.

1. Mr. Scott Schanuel, AICP, Woolpert, LLP, 1910 Pine Street, Suite 500, St. Louis, MO 63103, project manager for the Comprehensive Plan draft, gave a power point presentation on the overall process of the Comprehensive Plan draft. Mr. Schanuel stated that the Comprehensive Plan is the official statement of the City concerning future land use and physical development in Chesterfield. It will be a coordinated and unified policy document for guidance on public and private decisions dealing with development.

- . The Citizen Advisory Committee consisted of 22 members appointed by the City Council representing the Council, Planning Commission and the community.
- . The Comprehensive Plan is organized around plan policies and recommendations based on those policies, appendixes dealing with Chesterfield Valley, the entire existing conditions report and a summary of the citizen involvement program. The policies are organized into ten (10) categories and represent 98 policies for following by the City.

- . The Plan Policies category generally dealt with principles of comprehensive planning and how that relates to the City of Chesterfield, adherence and maintenance to the plan, policies for the maintenance of high quality development standards, diversification of life style opportunities within the City of Chesterfield and incorporation

and further study of the Chesterfield Valley and the Urban Core to make sure that those projects are consistent with the planned policies.

- Residential Development Policies – The creation and preservation of quality neighborhoods, compatible in-fill construction, compatible adjacent land uses and buffers to preserve the existing neighborhoods, best locations for residential and non-single family residential uses throughout the community, and the Urban-Core as a focal point for the higher density multi-family projects as well as some key arterial street locations.
- Commercial Development Policies – Hierarchy of retail centers to identify by the intensity of the use, location and how best they are distributed throughout the community and to make sure the commercial developments have fixed boundaries to avoid uncontrolled growth into non-commercial areas.
- Office Development Policies – Identify the best locations for the different densities of office.
- Research & Development Business Parks and Single Tenant Corporate Campuses Policies – Establish performance standards and identify sites for these parks and campuses in the Urban Core and the Valley.
- Industrial Development Policies – Low-intensity industrial commitment limited to the Valley, west of Long Road and the development of performance standards.
- Transportation Policies – Chesterfield Transportation Model was a foundation for the Committee's work on this policy. Reviewed function and level of service, expansion projects, total system management policies and multi-modal transportation.
- Utilities Policies – Coordinating development approval with the financial ability by the City and the developer to provide water and sewer service, enforcement of storm water management, and telecommunications towers.
- Public Facilities Policies – Balancing the growth of the Spirit of St. Louis Airport against its impact on the quality of life of the residential community.
- Parks and Open Space Policies – Preserve and create park-like amenities by both the public and private sectors.
- The Conceptual Land Use Plan is based on the above plan policies.
- The Transportation Plan is based on the same principles as well as the region's 20-year plan, transportation improvements that deal with existing roadways and new road projects.
- Community Facilities and Infrastructure Plan – Very specific to utilities, parks, recreation and open space, public schools and public facilities.
- Appendices - Appendix C-Community Involvement – Key results from community input - Preserve existing neighborhoods and create new neighborhoods with character and style, maintain high quality development standards with strong landscape features, expand the diversity of residential employment and recreational opportunities, improvement of traffic through increased roadway capacity and alternative modes of transportation (walking, bike trails, public transportation), protect and preserve natural areas within the community.

COMMENTS/DISCUSSION

Commissioner Nolen stated that she would like clarification on the differences of what is current and proposed and whether it could really happen.

Mr. Schanuel stated an overlay could be presented to show where there is non-conformity between existing land use or zoning and the proposed land use plan.

Commissioner Macaluso requested that all color legends be identical on the maps.

SPEAKERS – NEUTRAL

1. Ms. Laura Lueking, 15021 Conway Road, Chesterfield, MO 63017, speaking neutral to P.Z. 11-2002 City of Chesterfield;

- Speaker expressed concern with the varying differences in the maps particularly North Outer Forty and Conway Road and building height maximum, institutional zoning and residential, and no mention of the triple left turn;
- Speaker stated that she likes the definition of low-density in the Glossary on page 50 of the new Comprehensive Plan versus the references to low-density office on page 14, 4.1.2, with the header ‘Low Density Office Development,’ “...up to 5 stories or 70 feet maximum.”
- Speaker asked to have Planning Commission added before the City Council on Section 1, page 1;
- Speaker stated that she prefers that the word ‘adaptable’ be used instead of ‘flexibility.’

2. Mr. Barry Flachsbart, 347 Ridge Meadow Drive, Chesterfield, MO 63017, Councilmember but speaking as an individual in opposition of P.Z. 11-2002 City of Chesterfield;

- Speaker stated that he is opposed to this draft of the Comprehensive Plan in its present form;
- Speaker stated that the maps are inconsistent and in contradiction with some of the planning actions that have been taken in the last few years;
- Speaker suggested a thorough and detailed review particularly of areas where rezoning efforts have been made in the past five (5) years and where other than residential zoning is called for. Speaker suggested that this be done on a track-by-track basis;
- Speaker presented a hand-out to the Commission outlining changes he proposes.

3. Mr. C. E. Hathaway, 112 High Valley, Chesterfield, MO 63017, speaking in opposition to P.Z. 11-2002 City of Chesterfield;

- Speaker urged the Commission to table any approval of this draft until further review and revision;

- . Speaker stated that the review should be done by residents and not outside consultants;
- . Speaker stated that Chesterfield Valley and the Chesterfield Mall areas need to be included as integral parts of the City subject to applicable policies from the City from a Planning and Zoning perspective and stop using capitalized terms such as Chesterfield Valley and Urban Core;
- . Speaker stated that this draft lacks a concise statement of purpose. Speaker suggested that a description of the process for this draft be on page 1 immediately after the purpose;
- . Speaker stated that the draft fails to identify the changes made from the existing Comprehensive Plan and the reasons for those changes;
- . Speaker stated that the draft needs editing to reduce redundancy between sections and to clarify the text.

4. Ms. Betty Hathaway, 112 High Valley, Chesterfield, MO 63017, speaking in opposition to P.Z. 11-2002 City of Chesterfield;

- . Speaker stated that she does not like the front cover of the Comprehensive Plan draft and suggested that the cover be replaced with the City of Chesterfield logo or a picture of Central City Park.

5. Ms. Karyn Griffin, 16657 Chesterfield Manor Drive, Chesterfield, MO 63005, speaking neutral to P.Z. 11-2002 City of Chesterfield;

- . Speaker suggested that the format be changed to chapters for existing conditions, proposed changes, plans, goals, policies and the action items to implement those policies. Speaker stated that the current format requires jumping from chapter to chapter;
- . Speaker suggested using the term 'bicycle lanes' instead of 'bicycle trails.'

City Attorney Beach stated that the Comprehensive Plan needs to be refined and deal more with in-fills.

Mayor John Nations expressed appreciation for the hours of volunteer work by residents and thanked them for their hard work and contribution on this draft.
