INVOCATION: The Reverend Jerrol Boehmer, Green Trails United Methodist Church

PLEDGE OF ALLEGIANCE - All

PUBLIC HEARINGS - City Attorney Doug Beach read the opening comments.

- A. P.Z. 22-90 Sverdrup Investments, Inc.; a request for a change of zoning from "NU" Non-Urban District, "C-8" Planned Commercial District and "FPC-8" Flood Plain Planned Commercial District to "C-8" Planned Commercial District, Amended "C-8" Planned Commercial District, "FPC-8" Flood Plain Planned Commercial District, and Amended "FPC-8" Flood Plain Commercial District for a 22.65 acre tract of land located on the south side of Conway Road, approximately 250 feet west of White Road (Locator Numbers 18R220075 and 19R540044); the proposed uses include office and hotel uses and the following "C-6" Office and Research District Permitted uses: bookstores, business and professional services wholly accessory to office operations and activities, employee dining facility for

specific use of a designated office or research building or group of office or research buildings under the same ownership or management, and nursery schools and day nurseries.

Mr. Al Michenfelder, Attorney for Sverdrup Investment Company, presented the request (Pete Kinsella, Jr. ran the slides), as follows:

- Past zoning history, description, location, and surrounding land uses of the proposed site (22.65 acres)
- Sverdrup currently owns 17 acres already zoned "C-8" Planned Commercial District, the request is for rezoning of five (5) additional acres (presently under contract to purchase from a church) for "C-8" Planned Commercial
- Principal access requested is limited to extension of Timberlake Drive into this property, but will afford access only to Highway 40 and the Service Road
- The Conway Family Cemetery will be maintained by the County
- Instead of the original proposal by Schnucks of three office buildings, totaling 320,000 square feet, Sverdrup proposes four office buildings (4-story, 87,500 square feet each, for a total of 350,000 square feet), and one 3-story, limited service hotel (152 rooms) are proposed
- The five acre parcel is to be partially occupied by a proposed hotel (152 room, limited service hotel - a model similar to a Residence Inn or a Courtyard Inn). There would be no public restaurant (the food provisions being only for guests of the hotel), a private bar, small meeting room (not to exceed 50 people), and small pool.
- The majority of parking spaces are provided in a parking structure (total of 1,356 spaces, of which 982 will be in a number of parking structures). The primary purpose of these structures is to maximize open space.
- Open space (green space) is proposed to be from 42 1/2% to 49%
- A major water feature is proposed in the southeast corner of the property, which is a retention basin, permanent water body, and aesthetic factor in the environment created.
- Jogging trails are proposed for the east and north property lines, in addition to the various forms of landscaping depicted on the site plan.
- A two-level parking structure is proposed along the north line of the property, set back 90 feet from Conway Road. The upper level of the

parking will be, for all practical purposes, surface parking because the parking structure will not be visible from Conway Road. The current ordinance contains a setback provision which would require no building closer than 300 feet from Conway, and no parking closer than 75 feet.

- North of the hotel, the setback is 180 feet, which includes the existing cemetery, which remains as a permanent buffer.
- Existing trees and shrubbery principally along the north line of Conway Road and the east line of the property, will be retained and augmented to the extent possible.
- The top of the hotel will be barely visible from Conway Road. The height of the proposed hotel will be approximately 12 feet higher than the existing Conway Day School.
- Exterior facade would be similar to a red granite facility at Riverport.
- The petitioner's understanding of the Land Use Plan is that the proposed five acres shown as residential are to be developed for multi-family purposes. Therefore, a multi-family complex on that tract would want visibility to and from Conway Road, and access to and from Conway, which this proposal does not envision. The proposed hotel use is a "pseudo" residential type of use, and less intensive than office use at the same location.
- The additional 30,000 square feet of office requested by Sverdrup, plus the hotel, are balanced by the fact that there are five (5) acres more before the Commission than were zoned by the County in 1988. Therefore, the actual density, per acre, of the total Schnucks development, as compared to the total Sverdrup development, is the same (18,800 square feet per acre).
- The Traffic Engineers of Sverdrup compared the traffic generation report to the projected traffic of the original Schnucks development, adding 30,000 square feet of office space and a 152 room hotel. They conclude that it will not increase the total trip generation by more than 13%, and that the figure has no negative impact upon the ability of the Service Road or Highway 40 to handle that incremental increase.
- This would be the 5th major office/retail project in which Sverdrup would be involved. All have been successful.
- The Sverdrup Company has met with residents of six surrounding subdivisions (Conway Meadows, Shenandoah, Conway Forest, Highlands, Chesterfield Hills, and Thousand Oaks) to discuss plan.

COMMENTS/CONCERNS OF COMMISSION

- Concern regarding visual effect of parking structure from Conway Road.
- Concern that the parking garage would be visible to traffic along White Road.
- Clarification was requested regarding the traffic generation study which stated there would be no more than a 13% increase in traffic compared to the originally approved Schnucks project.
- Concern that traffic generation report by petitioner is not accurate.
- Hotel setback from Conway of 180 feet does not conform with the original zoning setback requirement of 300 feet. The length of the property from Conway Road to the south is 389 feet.
- The Comprehensive Plan shows the area along Conway Road as single-family attached housing, rather than multi-family.
- All mechanical equipment would be placed on the roof of structures.
- Parking structure would be reinforced concrete decks (no ramps), the slope of the property allows entrance to both elevations at grade.
- Peak hour traffic generated for the proposed zoning is estimated to be 650 vehicles, as compared to approximately 580 for the existing zoning, but is not cumulative to 1,200.
- The Sverdrup Engineer stated that the four (4) 87,500 square foot office buildings would generate 222 inbound trips, 93 outbound trips during peak hours.
- Concern was expressed over the density of the development.

SPEAKERS IN FAVOR

1. Terry Wunderlick, 16 Fox Hunt, White Plains Subdivision, Chesterfield, MO 63017, as an individual.
2. Robert Mass, 300 Valley Forge Court, Baywood Village, Chesterfield, MO 63017, for the group of Baywood Villages Condominiums.
3. Barry Senseman, 1846 Winter Run Court, Chesterfield, MO 63017, as an individual.

4. Bob Senseman, 15020 Conway, Chesterfield, MO 63017, as an individual.

SPEAKERS IN OPPOSITION

1. George Murray, 1330 Conway Oaks Drive, Chesterfield, MO 63017, as an individual.
2. Lynne Johnson, 15125 Conway Road, Chesterfield, MO 63017, as an individual.
3. T. J. Haselton, 14130 Conway Road, Chesterfield, MO 63017, as an individual.

REBUTTAL

Mr. Michenfelder stated the following:

- The existing Conway Day School building will be removed, but the grade elevation will remain as is. Only the top of the proposed hotel building will be visible from Conway Road on the cross-sections. None of the existing trees or shrubs will be altered, other than to be improved or augmented, and the cemetery will be spruced-up and maintained in a more presentable manner, and will be available for those interested in local history to inspect gravestones, etc.
- The hotel is no more than an extension of the "C-8" already granted to this property to the east (on Conway Road).
- Due to the grade situation along Conway, the two-level parking structure (75 feet from Conway on the east) and the hotel building (180 feet from Conway on the west) are virtually invisible to Conway Road residents. The four (4) story office buildings will not be visible.
- Access from Conway Road was considered by Sverdrup and deemed unnecessary for this development.
- Sverdrup will not be the originator of any request to have access from Conway Road.

COMMENTS/DISCUSSION BY COMMISSION

- It was suggested that the developer plan some parking underneath the office buildings, and leave some of the land in green space.

- The building elevations would be affected if parking were to be added underground
- Added landscaping was suggested to buffer the parking and building areas.
- Concern over the visibility of the tops of the parking garages, and the possibility of adding some landscaping.
- Desire was expressed regarding preservation of existing tree line and additional landscaping along west portion of site.
