Discussion of Revision of Zoning and Subdivision Regulations to date.

Director Duepner very briefly noted to the Committee that the Department had developed zoning categories which reflected the recommendations and philosophy as presented by Mr. Kendig. These categories are based on the current residential categories of the City's Zoning Ordinance. Staff had prepared these in view of the recent vote of the incorporation of Wildwood and the annexation of the Western annexation in February, which may limit the potential for westward expansion of the City. Question posed by staff was the need for the complete revision of the zoning regulations if there will not be potential significant areas for future growth to the west. The Committee directed this Department to report on this further at the next meeting.
