Veteran's Honor Park is also a project Lisa is actively working

Michelle shared our priorities. With Lisa's marketing experience and big picture, what can we be doing to change or assist?

- providing special support & the ambassador program
- distributing info about the parks to the community
- making more in our community aware of Friend of Parks
- Table at events

Lisa said building a database is key. Newsletter is another option

Darcy asked if there are more applications recently

Kimberly asked about the size of the database (after Taste). Lisa will look into it

- Any thoughts about using gamification to drive to website or social media, engage

Lisa said they are building an email list serve - using mail chimp will filter website sign ups - Manually transferring which takes time.

Lisa had a meeting yesterday to discuss mobile apps and other ways to track & promote

Laura asked about QR codes....Lisa mentioned they are good to connect with community

Kimberly asked about using text for announcements, coupons, event reminders, etc.

Lisa said the challenge is that the website is not in a position to have multiple options when someone signs up. So, if someone signs up for notification about a concert, the site does not prompt to offer additional options (i.e. You like Concerts, maybe you'll like other events in the community).
