Pedestrian Improvement Zone		

DISCLAIMER:
The bicycle & pedestrian facilities shown on this map, and in the accompanying implementation matrix, represent initial recommendations for further discussion and consideration by the City of Chesterfield. They were developed based on extensive work and public involvement during Phase 1 of the study. After they have been fully discussed and as modified at the second public forum on September 16, 2009, they are intended to be used as a guide for the development of annual implementation strategies by the City under the executive and legislative oversight of the Mayor and City Council.
