**CHESTERFIELD PARKWAY WEST (NORTH) RESURFACING  
ST. LOUIS COUNTY PROJECT NO. AR-1545  
FEDERAL PROJECT NO. STP-5410(628)**

Project Notification Letter

Dear Property Owner or Occupant:

We would like to advise you that a contract for roadway improvements to Chesterfield Parkway West (North) has been awarded to N.B. West Contracting, 2780 Mary Avenue, St. Louis, Missouri 63144. The project limits are from the I-64 westbound on-ramp to just west of Olive Boulevard.

This project is funded by St. Louis County and will be accomplished without additional direct cost to you. As taxpayers, we all share in the cost of projects throughout St. Louis County. The project provides for removal and replacement of concrete pavement, sidewalk and curb; an asphalt overlay; and other incidental items. In addition, alterations will be performed to existing curb ramp configurations to comply with ADA guidelines. Finally, this project will add a second left-turn only lane from east-bound Chesterfield Parkway on to north-bound Swingley Ridge Road.

Please be advised that construction work is scheduled to begin in early March of 2018, weather permitting. The length of the construction period is a concern to most people. Unfortunately, the complexity of the construction work combined with the unpredictable weather in the St. Louis region will dictate the length of time for completion. With this in mind, we would expect that the paving work on the project will be completed by late summer 2018 and the final restoration work will be completed by fall 2018.

Most construction work performed will generally take place between the hours of 7:00 A.M. and 3:30 P.M. weekdays, however, asphalt paving operations are scheduled to take place at night. Lane restrictions will be in place at various times and locations, but no complete street closures are anticipated. On days when concrete pavement is being poured, traffic may be stopped for up to 15 minutes at a time in order for the concrete to be unloaded from the delivery truck. It is recommended that alternative routes/parking be determined, and/or sufficient time be allotted for your daily commutes. Emergency vehicles such as police, fire and ambulance will be advised of the construction, thereby allowing these agencies to plan in advance in case there is an emergency in your area. No commercial or residential entrances along the route will be closed completely for any given time.

Mr. Justin Ryder, Project Manager for St. Louis County, will be the Resident Engineer assigned to the project. Mr. Ryder may be reached at 314-651-6641 to respond to on-site inquiries. Should Mr. Ryder not be available, please contact Mr. Greg Poppitz, Supervisor, Project Managers, at 314-615-1160 during normal working hours (7:00 A.M. to 3:30 P.M., M – F). A voice mail message may be left at either of these numbers and a response will be returned as soon as possible. Robert Bond will be the Project Manager for N.B. West Contracting and can be reached at 314-962-3145. If there is an emergency *after* normal working hours, please contact the St. Louis County Police Dispatcher at 636-529-8210.

We appreciate your patience during the construction of this project and apologize for any inconvenience this may cause you. Every effort will be made to complete the construction work as soon as possible. Remember, construction areas can be dangerous. If you have children, remind them to stay away from the work areas at all times. For the safety of the traveling public, yourself, and the workers, please reduce your speed and drive cautiously through the construction zone.
