Dear Mike:

At their September 22, 2004 meeting, the Chesterfield Community Development Corporation (CCDC) Board of Directors unanimously approved a six-month contract with McKinney Associates. This contract is for the provision of professional services related to flood protection and drainage improvements in Chesterfield Valley. The CCDC is now asking the City to renew its commitment to the Valley by extending our contract for the management of this service.

As you know, considerable progress has been made toward the completion of a 500-year levee. Construction of the remaining levee improvements has begun. In addition to this, reimbursement is being sought for local funds contributed in excess of the required match. Any reimbursement would go directly to the TIF fund, allowing other critical improvements to be made. Col. McKinney's expertise is essential to the effort of obtaining this reimbursement and annual appropriations to allow the timely construction of the portion to be built by the Corps of Engineers.

The Board feels it is imperative that the City not deviate from the course of action initially taken until this project is completed. Therefore, the CCDC is asking the City to pass a resolution extending the terms of Ordinance #847. The extension of this ordinance will provide the funding necessary for us to implement the contract with McKinney Associates, a copy of which is enclosed.

Should you or any of the City Council have questions regarding this matter, please contact me. If you need anything else from us before this can appear on the agenda, please call me.

Sincerely,

Joel A. Smiley
Executive Director
