P.C. 61 & 62-87	Clifford Curry
P.C. 85-87	Western Oil
P.C. 134-87	Missouri Annual Conference of the United Methodist Church

The original files, because of the availability of the microfiche, are no longer needed and are taking up greatly needed file space. The Department is utilizing microfiche and the fiche reader/printer for researching projects, rather than the original files.

The Department plans to keep on file a copy of the recorded site development plan and the most current ordinance relating to the petition. The Department would like to clear our files of old site development plans, outdated copies of city ordinances, correspondence relating to the petition and any other related materials. Therefore, at this time, the Department of Planning/Economic Development is requesting guidance on the appropriate manner in which the files may be disposed of. Is it necessary that a request be placed on an agenda for approval by City Council or may we dispose of the files without approval?

Please advise this Department as to how this matter should be handled.
